

Action Alert: High Rock, NV round-up - please send your comments by Wednesday

The Bureau of Land Management (BLM) is proposing to remove 402 of the estimated 482 of the High Rock Herd Management Area in Washoe County, NV, citing "lack of forage and available water." Yet, the environmental assessment states that "the canyons are relatively well-watered." The BLM is working with the Department of Wildlife to permanently re-route the horses' water to "water developments" for big game and cattle. The absolute minimum estimated cost of this round-up and annual containment of the captured horses is \$203,000.00.

Please protest this gross misuse of our natural resources and tax-dollars by sending your comments **before August 23** (this Wednesday) to:

E-MAIL: Steve_Surian@ca.blm.gov
FAX (530) 279-2171

Or write to:
SURPRISE FIELD OFFICE
PO BOX 460
CEDARVILLE, CA 96104
ATTENTION- OWEN BILLINGSLEY

Make sure to include your name and signature, and this reference number: # 4700 CA-264(CA-370) P

On behalf of the horses, thank you for your support,
